

CHAPTER 6 – REEF GLASS OUTLINE

Introduction

Chapter 6 Reef Glass is a stunning collection of glass tiles and mosaics featuring a soft frosted finish in a fresh color palette. As the name “Reef Glass” implies, the core of our design is to bring the feel of the coastline indoors by employing the soft and lustrous texture of beach glass. Our design team created distinctive mosaic patterns that are the perfect complement to the very fun, yet elegant coastal motif.

Key Features

Chapter 6 features six vibrant colors and is segmented into two general categories: Glass Fields and Glass Mosaics.

- **Colors**
 - The color palette of Chapter 6 provides six fresh colors: Lily, Palm, Aloe, Coconut, Marina, and Oceana. Colors ranging from a brisk white, lush foliage greens, tropical aqua, and a deep ocean blue are sure to enhance any coastal inspired design.
- **Field Tiles**
 - All six colors are offered in a traditional 3” x 6” subway tile and an inventive 6” x 16” field ideal for contemporary designs. In addition to the field tiles, a ¾” x 6” liner is available in each color for that perfect finishing or transition piece.
- **Mosaics**
 - Offered in each color are five mosaics featuring patterns designed to inspire various coastal themes. Nori, Shoal, Reed, and Pebble are offered in solids where Strand is presented in a vibrant three color blend.

Application:

Please reference the Application Chart for Chapter 6 on our website, JeffreyCourt.com, for more details on recommended applications.

Installation Tips

- **Blending and Shade Variation**
 - In general, Chapter 6 Reef Glass is classified as having a shade variation rating of 2 “Moderate”. Blending of cartons from multiple cartons is highly recommended to ensure a proper uniform look. All issues pertaining to shade variation should be addressed prior to installation. Use constitutes acceptance.
- **Setting Material and Grouts**
 - A high-quality white thinset meeting ANSI 118.4 or 118.11 is recommended for best installation results. Always check with setting material manufacturer to ensure suitability of material in setting glass tiles.
 - As per the Tile Council of North America (TCNA): “For cementitious grout, joints smaller than 1/8” generally should only be grouted with unsanded grout.

CHAPTER 6 – REEF GLASS OUTLINE

*Epoxy grout was used on all Marketing Materials (Montage Boards and Touch Boards) for the Chapter 14 Collection, pre-sealing material prior to grouting with epoxy grout is a must. Example recommendation: Aqua Mix® Grout Release.

- **Cutting**
 - A professional grade wet saw outfitted with a high-quality diamond blade designed for cutting glass tiles is recommended. Always cut tiles with the face up. Sanding of cut edges is recommended to ease “sharp” edge.

Merchandising

The marketing and merchandising of this collection is supported by 6 montage boards, 12 touch boards, and 36 sample cards which aid in displaying the full product line. All of these point of purchase materials are accompanied by the Chapter 6 Reef Glass catalog. Showroom installation and loose sample pieces can also be ordered at a discounted price.
